Friends, Customers and Fellow Members:

I greet you once more with my seventh little folder and my twenty-first year as a "glad" grower on a small scale.

With this message I give a picture of Yours Truly and crest of hill I cleared of brush, stones, stumps, etc.

Eight years ago there was about a three foot space cleared where I had moved the apple tree I am standing under. Last summer I cleared another lot of small stones, some the size of marbles, and planted iris between where I stand and the clumps of heather.

A college graduate told me fourteen years ago, nothing would grow on this hill, to dig large holes and plant apple trees. Yet last season glads, heather and iris flourished.

I planned, visualized and worked toward the clearing of the whole front of the hill from Main Street up two hundred and ninety-one feet on Broadway, a stupendous task for a little woman with lots of illness, bumps, falls, and a hospital sojourn in between.

I waited for the picture of the old home before going to the printer, only to have the photographer spoil the film. A cut could not be made so I am doing the next best thing and a few more lines from the scribbler's pen. I hope some time to attain my:

REALIZATION

By Catalina Hermana

I stand upon a crested hill,
The wildwood cut away,
Each glorious beauty fill
A place once bleak and gray.
Enraptured eyes I lift
Toward each gorgeous gem
And marvel at the gift
Our Maker gave to men.

Each radiant color blends
With sunset's dying glow,
When sunlight comes again
There's still a brighter show,
A type from every land,
All gems of Love Divine,
Augmented by the hands of man,
Dream rays of our golden clime.

Then bloom O! beautiful gems
In summer sun or shower,
To gladden hearts of men
In every nook and bower
Until you grow another Prince
Of charming grace and power
With dreams of rosy tints
O'erlaid with golden shower.
